

About Mission:

<https://mission.dev/>

Mission is building the best market network for product builders (engineers, developers, designers, and product managers) to work as independents. We support them with a platform designed to help teams build more efficiently, and provide them with unique opportunities to work on meaningful long-term missions and facilitate connections with a community of like-minded peers.

Being part of Mission is changing the way tech organizations approach their software development capabilities: we provide a solution that encompasses team design, methodology, engineering measurement, and more. We are a community of professionals and experts, passionate about engineering development, who share and co-learn best practices.

What do we expect from Software Engineer (Web/Mobile Developers, QA's, DevOps, Designers):

- 5+ Years of professional experience as an Engineer
- Experience in Start-up fast-paced environment
- Technical expertise with a specific stack or Tech environment
- Problem solver with the most efficient optimized solutions

Job Description: *Sr. Fullstack Developer*

Our client simplifies Construction Administration by bringing consultants, owners and contractors together, and providing the tools that enable teams, and the insights that inform business decisions.

What is this Mission about:

We're looking for a motivated Software Developer that's experienced in building quality software with continuous delivery. You'll have the opportunity to collaborate with a small, skilled team, grow your product-building capabilities, as well as impact the direction and standards of the company.

Special Requirements:

Location: Canada

Engagement: Full-Time (40h/week)

Duration: Long-term (No end date)

Company Type: Startup

Industry: Software Development

Rate: \$70 to \$90CAD hourly based on expertise

Tech Stack :

TypeScript - React - Redux - NodeJS - Python - NoSQL

Not required but experience is a plus :

- An eye for design
- Experience writing unit tests and testable code
- Familiarity with GCP (Cloud Functions, Cloud Run)

Vetting Process:

Every candidate who joins Mission must complete a one-time, three-step vetting process:

- Create your profile in our platform (10 – 15 minutes) through this link: [here](#)
- Perform a coding challenge: (1 hour approx.)
- Answer four questions in a one-way recorded interview (10 minutes).

If you think this is an interesting proposal, let's have a conversation, here is my calendly: [here](#)

Mission is recognized as a Great Place to Work, validated by those who work at Mission. With a culture that promotes open feedback, great perks that include the ability to work wherever and on your own schedule, the best way to discover for yourself what makes Mission great is to experience it first-hand.
